

Automate and Augment eSignature Workflows & Processes, Today.

FutureVault's unique DocuSign integration powers eSignature-driven workflows and processes to deliver enhanced client experience and gain massive back-office and administrative cost savings.

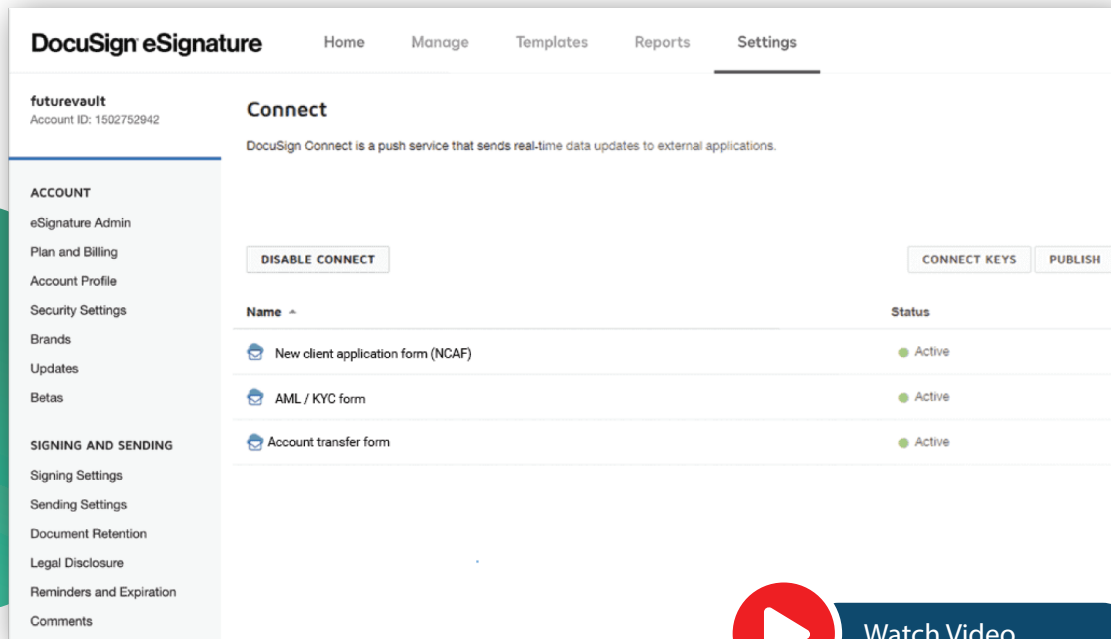

**Improve
& Automate**

Watch Video

- ✓ Securely connect your DocuSign Organization with your white label FutureVault Platform.
- ✓ Easily link DocuSign users with FutureVault users.
- ✓ All eSigned documents are made available to front and back-office teams with compliance activity trails associated with each document.
- ✓ Automatically create new client or member Vaults upon eSignature completion.
- ✓ Automatically deposit and deliver final eSigned documents to specific client Vault locations.
- ✓ eSign documents or send documents for signature directly from Vault accounts.

Save Time & Money by Automatically Creating New Vaults and Delivering Documents to Clients in Seconds.

Onboarding processes driven by DocuSign can automatically create new Vault accounts, making for a seamless client experience.

Any and all eSigned documents are automatically deposited into one or many folders within client Vaults, saving your back-office and administrative staff significant time and money from manually filing and sending documents.

Your clients can easily find documents with search or browse features via white-labeled web and mobile experiences.
